PREFACE

The Govt. of Odisha has decided to strengthen the teaching/learning of English in Odia medium Govt. Schools. The English Language Teaching Institute (ELTI) has already prepared a handbook on teaching English at the primary level. About sixty thousand teachers have been trained with the help of the book, during 2016-2017 and each teacher has been provided with a copy of the book. Next, the ELTI with the help of SCERT and OPEPA has prepared this new series of textbooks in English from Class-III to Class- VIII based on sound principles of English Language Teaching and principles of pedagogy enshrined in NCF 2005 . The books have been tried out with real learners and teachers. Necessary corrections have been made accordingly. I wish the teachers to read the introduction and notes for them provided in the books and teach the books accordingly. I also want the Inspecting Officials to go through the textbooks and supervise classes accordingly. The workbooks are carefully built into the textbooks. The teachers should use the books following a learner-centered approach and make learners' do the tasks. They should correct learners' scripts and provide feedback. The Inspecting Officials are expected to supervise this regularly. Each textbook has also in-built tests to test the performance of both the learners and teachers. Language indicators for each class are also provided at the end of the book for the guidance of both the teachers and Inspecting Officials. This will help the parents to check the progress of their wards. Attempts are also being made to prepare similar text books in other subjects from the coming years based on these sound principles. But unfortunately, our attempts to strengthen teaching/learning through good textbooks failed to yield expected results due to wide spread prevalent of cheap bazar notes (Meaning Books) prepared only with the motives of commercial gains. These books provide cheap ready-made helps by working out the tasks/activities thereby preventing students from getting/developing skills and restrict them from the pleasure of doing the workbook tasks/activities on their own.

I am sure, the new series will help our learners excel in all the four language skills of English --- Listening, Speaking, Reading and Writing. I thank the Editors and the Reviewers for their sincere efforts in preparing the excellent materials. I also thank Dr. Manmatha Kundu, the Academic Adviser and Mr. Indramani Tripathy, the Director of ELTI under whose academic and administrative guidance the books were prepared.

Any suggestions for the improvement of the book are welcome.

INTRODUCTION

The Secret of Language Learning

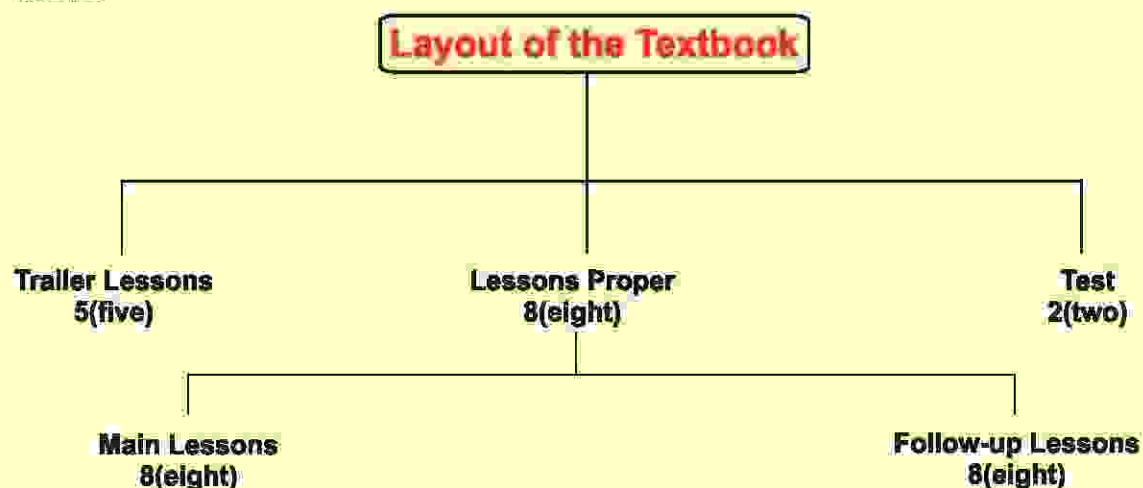

Language is mostly learnt through exposure and use in meaningful contexts. While the exposure to language is mainly done through listening and reading, use is done through speaking and writing. The more one listens to a language and reads in a language, the more s/he gets exposed to the language. Exposure lays the foundation of a language and also the foundation for using the language. One cannot use (speak) the language unless one has sufficiently listened to the language. One cannot write the language unless one has widely read the language. And both the exposure and use are to be done in meaningful contexts. What one listens and reads should be useful and interesting to him/her. Similarly, what one speaks and writes should also be interesting and useful for the user. In other words, all these are to be done in contexts and the user should be involved in the activities. This is the secret behind learning any language.

What implication does this have for teaching English to our learners? First, our learners should be sufficiently exposed to English through listening. In case of acquiring mother tongue, a child listens to the language for long to be able to speak. Listening to the language lays foundation for speaking. Do we provide enough exposure to English through listening before teaching our learners to speak and write in our Odia medium schools? Certainly not. We usually tend to start teaching English from reading and writing. This is why our learners in Odia medium schools face difficulties in learning English. Then, how to overcome such difficulties? In order to do this we have to change the current trend of teaching English. Instead of beginning teaching of reading and writing, we should first develop the listening and speaking skills of our learners through storytelling and TPR (Total Physical Response) activities. The current Primer of English (Class III) has, therefore, been revised and rewritten with enough pre-primer activities (story-telling, Rhymes, Known English Words, TPR, etc.) before learners learn to read and write.

The Textbook

The class IV English textbook has also been revised and rewritten keeping in mind the development of listening and speaking skills of our learners along with the skills of reading and writing. In this book there are enough listening and speaking activities provided under

each lesson mainly through listening and speaking activities. The layout of the book is as follows.

The trailer lessons, as the name suggests, are trailers from main lessons, simple parts, served with rhymes and action songs. The main purpose of this section is to help the learners learn what they have not learned before. Currently, majority of learners are below their class level in terms of skills, more so in English classes. If their skills are not levelled up through right kind of learning, the main lessons will not work and the teacher will take recourse to reading aloud and explaining the text often in Odia and somehow to complete the course as they were accustomed to doing before. The tasks provided, therefore, are tasks for beginners (Class III) such as handwriting, writing words, phrases and simple sentences mostly of copying kind- listen and talk, see and write. These five trailer lessons serve as steps for reaching the lessons proper.

Lessons Proper

There are eight lessons – 4 prose pieces and 4 poems. These pieces are very carefully chosen, the main criteria of selection being simplicity (language) and interest value for the young learners of 9-10 years old. Each lesson has three major sections: Pre-reading, While-reading and Post-reading. The purpose of pre-reading is to motivate the learners to read the text. The while-reading phase is devoted to interactive reading. The learner is taught to interact (communicate) with the writer through the text. This is the most important phase of the lesson. If this part is not properly done, the next phase, post-reading, becomes futile. The post-reading phase is devoted to interesting learning activities based on the text. While doing these activities, the learner reads and rereads the text on his/her own without being conscious of the fact that s/he is reading so many times. The activities become the main product and learning skills become the by-product.

Follow-up Lessons

These are, in fact, sub-lessons of the main lessons. In this book, one sub-lesson is given under each main lesson. These are called follow-up lessons. The sub-lessons are

shorter and simpler than the main lesson. The themes are related to the themes of the main lessons. Compared to the main lessons, the sub-lessons are less controlled in the sense that both the teacher and learners are given freedom to work on their own. The primary purpose of the approach is development of autonomous learning. While the questions and activities are provided in the main lessons by the editors, teachers are encouraged to frame their own questions and activities for sub-lessons. Similarly, the learners are encouraged to read and comprehend the text and do the activities on their own with less guidance from the teachers. Learners are encouraged to self-correct and peer-correct their own writings. The other purpose of these sub-lessons is to relate the main text to their daily life experiences and real life use of English. In other words, they are discouraged to be textbookcentric.

Tests

There are two tests, one after the 4th lesson and the other at the end. The tests are of 100 marks each. The tests intend to test the English language skills of the learners, the skills expected to be developed through these lessons. The test results will provide feedback to both the learners and the teachers. The learners will get the feedback whether they have developed the English language skills studying the text or not and the teacher will get the feedback whether they have been successful in helping the learners develop the expected English language skills or not. The tests will also help teachers frame similar small tests to be administered to students on a regular basis .

Interlinking Materials and Methods

During the early phase of textbook writing, methods of teaching were not reflected in the textbook. So the teachers used their own ways up handling the methods. Attempts have, therefore, been made in the book to link material and method. The material writers while preparing the textbook, visualised the method the teacher is to use to transact the materials in the classroom. As a result, only those persons having first-hand experience of teaching are asked to prepare material and try-out them with real learners. The general approach suggested is learner-centred and activity –oriented approach with some specific techniques of teaching such as BS (Brainstorming), Chain-Drill, VMDT (Visual Memory Development Technique) and MT (Mental Talk).A brief description of these four techniques is provided in Appendix-III; Notes on Methods . The introduction along with four Appendices constitute a training package for the teachers. The book is based on the principle of NCF (National Curriculum Framework) 2005 and pedagogy.

THE BLUE JACKAL

I Pre-reading

Session-1

Have you heard the Odia story **Nilabarna Srugala**? Who can tell me the story in Odia ? Here is a story which is very similar to it. Let's read the story.

II**While-reading****● SGP-1**

● *Read paragraphs 1 and 2 silently and answer the questions that follow.*

1. Once there was a jackal. He was looking for food. He fell into a tub. It was filled with blue coloured water. It was made so for colouring clothes. With great difficulties the jackal came out of it. He looked all blue. He was very different not only from his own race of jackals but also from other animals of the forest. He planned to befool all the animals. To look still very different, he wore a pair of spectacles. He carefully hid his face wearing a cap. Then he sat over an anthill. The mole saw this animal first. He reported it to the rabbit. The rabbit reported it to the deer. The deer reported it to the giraffe. The giraffe reported it to the elephant. The elephant reported it to the tiger. And the tiger reported it to the lion, the king of the forest.

2. The lion came to see this new animal with other animals. The blue jackal planned not to talk. He only talked through action. The king asked him with respect, 'Sir, where are you from?' The blue jackal looked at the sky. The lion guessed he had come from the heaven. Next he asked, "Sir, kindly tell us why have you come from the heaven to this poor world?" The jackal first moved his head clock-wise, then anti-clock wise. The lion and other animals well understood what the blue jackal wanted to say. He had come to rule them all. He would be their king.

Some jackals also came to serve him. But the blue jackal, through his action, drove them away. All the jackals became very unhappy. One of them was wise and old. He watched closely the new king's manners. He could know that the new king might be one of their race but in different colour. To be more sure, one day he asked the rabbit, "What does your king love to eat ?" The rabbit said, "He likes to eat crab curry very much." He asked next "Where does he like to live?" The rabbit said, "Don't ask me about this. He is our great king, but very humble and simple. He does not want to eat sweets, but only crabs. He does not want to live in the palace but only inside holes."

4. The old jackal was now sure that the king was no other than one of his own race. One day the king was presiding over a meeting of all animals. The old jackal secretly called all his jackal friends. From a little far away they hid themselves under the bushes. The meeting was in full swing, all the jackals shouted together *"Hooke hoo, Hooke hoo, Hooke hoo....."* The blue jackal also started saying *"Hooke hoo, Hooke hoo !* Knowing him no other than a mere jackal, they chased and killed him.

THE STRANGER AT THE DOOR

I Pre-reading

Session-1

- **Socialisation**
- **Teacher tells you this story.**

All of you must have heard about Gopabandhu Das. What do the people of Odisha call him? "UtkalmaniGopabandhu". Do you want to know what he did one day?

It was noon. It was time for lunch. Gopabandhu had worked hard that day. He helped the poor people. They were suffering from cholera. He came home for lunch. Just when he was ready to take his lunch, he heard a poor beggar begging, "Give me something to eat. I haven't eaten anything for the last two days". Gopabandhu took all the food given to him on the banana leaf. He gave it to the beggar. The beggar took the food. Gopabandhu was very happy though he was hungry himself.

Read this text below. The topic of the text is very similar to what you heard about Gopabandhu.

II While-reading

SGP-1

- **Read paragraphs 1-3 silently and answer the questions that follow.**

1. A poor old couple were sitting inside their small hut. It was time for supper. But they had hardly anything to eat. They had only two pieces of

bread and half a glass of milk. It was raining outside. The weather was a bit windy. The nearby shops had closed long back. There was hardly anybody outside. The cold weather had put everybody inside.

2. The old woman murmured, "Somehow we'll manage tonight, but what about tomorrow? It seems the rain will not stop and we will have to go without food for a day or two".

3. "Have we not had such starved night before? Let's have hope for future." said the old man. And just when they were going to have their supper, someone knocked at the door. The old man opened the door. A thin shrunken beggar-like man in rags was outside. "Sir, I have not eaten anything for the last two days. Can I get something to eat?" The old man's wife went inside and brought two pieces of bread and the half glass of milk for the man. The man gulped the food in no time to his heart's content and left.

● **Comprehension Questions:**

5. "I too feel that way,"told the old man. Both of them decided to go to bed without food. The old woman went to the kitchen to shut the door. But..., what did she see!!
6. The bread and the glass of milk was still there. Coming close she could see-not just two pieces but six or eight pieces of bread and a full glass of milk. She loudly called her husband, "Come and see what had happened here!" The old man came and was surprised to see what had happened. They did not think of eating. They thought of the poor beggar, who ate only two pieces of bread and half a glass of milk. They wished they should have given him more to eat.

APPENDIX-I

NOTES FOR TEACHERS

In helping learners learn, the teacher's role is very crucial. A country's education is as good as its teachers. In order to help our learners learn English we wish you to read the introduction to class-III English Primer before you read the introduction of this book. We have revised all our English textbooks from class III to class VIII and all these books now follow a common pattern well supported by sound pedagogy. It will, therefore, be easy on your part now to deal with all these textbooks to help your learners learn English. In our introduction to class III English textbook, we have stated, in some details, the problems of teaching English in the first year of learning English and how we have solved these problems. There was a big gap between the class III and class IV English textbooks. We have bridged the gap by carefully redesigning both the textbooks. Now the class III students, who will read the new book, will have no problem in reading this book. But students who have studied the old book and now studying in class IV, are likely to have some problems.

But we have tried to solve these problems through the introduction of trailer lessons to class IV textbook. Stated below are some suggestions for you how you can to deal with different parts of a lesson.

Socialization – Every class should start with socialization and end with leave taking as suggested in the introduction to class III textbook.

Teacher: Good Morning students.

Students: Good Morning sir/madam.

Teacher: How are you students?

Students: Fine, thank you sir/madam.

Leave Taking

Teacher: Good bye students. See you in the next class. Have a good day.

Students: Thank you sir/madam. Good bye.

Trailer-Lessons

The main purpose of trailer lessons, as stated before, is to help what the learners have not learned in the previous classes. It includes learning to write capital

and small letters with right strokes and learn how to write words, phrases, sentences and a small chunk of writing in good hand. In order to take away the boredom of this task, we have placed different tasks in between songs. Learners will sing a song together, enjoy and forget the hard work done before and get ready to work again after brief relaxation. It is good to take the learners in confidence in this regard. Tell them this is hard work. We will work hard and enjoy with a song. Once taken into confidence, they will cooperate. Impositions will not work. As the main purpose is setting the learner's handwriting right, the instructions for good handwriting are provided in Appendix-II; Notes on Methods.

After a session of writing, you are to see what the learners have written, correct their errors and provide feedback. If the class is large and you cannot see everyone's script, it is better to see some scripts, find common mistakes and provide class feedback (feedback for the whole class) using the blackboard. To help students who lag behind, who fail to do the task, you have to help them personally or ask your good students to help them (as most of the good students complete their tasks early). If we do not help them at this stage, they will be problem for us in future.

Each trailer lesson has six sessions, one session for one class of 45 minutes duration.

Main Lessons

Each main lesson, as stated before, has three sessions- pre-reading, while-reading and post-reading.

Pre-reading

At this stage, your role is to motivate your learners to read the text and we have suggested ways to help you. All the instructions for you and your learners are to be spoken by you to the learners. You just see them, read aloud what is written as if you are speaking to your students. Finding a pre-reading activity is difficult. If you have no better alternative, better stick to one that is provided.

While-reading

This, as stated before, is the most important part of a lesson. Take extra care not to read aloud and explain. Allow students to read on their own and comprehend as much as they can. When you ask them to read silently, you do two things – see that all

are engaged in reading and get yourself ready for the question answer part. Even if some of your students are incapable of reading, let them see the text. Even seeing the text and getting a picture of it will be of some help for learning, better than your explanation of the text. While asking questions, follow the suggestions provided in Appendix-III

Do not ask your students to write at this stage. This phase is purely for verbal transaction. Students will keep open their textbooks and locate the answers in their texts. Students who cannot read and comprehend will also gain if they just look at the text again and again. And if they do this for long, they will somehow learn to read. All our previous experiences are stored in our brain as pictures- the places and sights we have seen whether we have understood them fully or not. Let them store the picture of the page /paragraph in their mind in this way. Some comprehension questions can be asked both in English and Odia. Students can answer in words / phrases and at times in Odia, Student should not be forced to answer in complete sentences.

Post-reading

As stated before this phase has a series of mind engaging interesting activities for the students. Your job is to make the learners do these activities. While doing these activities, learners will most of the time, keep open their books and will be allowed to consult the text at the time of need. Remember, at this stage the learners will read and reread the text many a time on their own without being aware of the fact that they have read the text so many times. What they have not understood during while-reading phase, they understand at this phase. The self-learning that you have initiated during while-reading now bears fruit. To do the activities, they read the text on their own again and again.

For easy transaction of post-reading activities of all the main lessons follow a common pattern. There are nine kinds of activities for each of the lessons bearing the same number. For example, the VMDT activity bears the number -1 and comes first in all the main lessons. Let's describe what you have to do for each of the activities from activity 1 to 9.

1.VMDT (Visual Memory Development Technique)

Please read about this method in Appendix-II. The objective of this method is to develop the visual memory of the learners. Once visual memory is developed, learning becomes easy. Usually under this, two kinds of activities are provided – the whole text and the part of a text. First VMDT is done for the whole text and then for a smaller part of it. Learners take photograph of the part with their eye cameras and then locate the answer as per your question. Then open their eyes and verify. For each item this procedure is followed. Students are found to enjoy this activity very much. And the advantage of this activity is that the teachers need not always verify whether the learners have done the activity correctly or not. The teacher can see only some. The learners take the responsibility of identifying and correcting their own errors.

2.Comprehension Activities

The purpose of these activities is helping learners get an overall comprehension of the text. Different types of activities are provided in the text.

3. Listening

Listening lays the foundation for other language skills. Therefore, we have included listening activities – you are to read aloud either some words or a chunk (a small paragraph or a stanza) your students listen to you and do the task provided in their book. You have to read aloud slowly and clearly. You can also repeat the part. After your students do the task, you can provide class feedback, if the students are more in number. You write the correct answers on the blackboard. The learners self-correct their scripts.

4. Speaking

Usually three kinds of activities are included under speaking—reading aloud, chain-drill and dialogue. For reading aloud, follow the suggestions provided in Appendix-II; Rules of Reading Aloud.

For chain-drill read about the method stated before. The lines to be drilled are provided. If students are low – proficient and shy, you can first have a rehearsal – you read aloud the line, students repeat after you. Do this two times. You can also write the line on the blackboard in good handwriting.

For dialogue, follow the following steps.

1. Write the dialogue in good handwriting on the blackboard.
2. Have a rehearsal – you read aloud, students repeat.
3. 2 rounds: Teacher- vs. - students, students –vs. - students

5. Vocabulary (as suggested)

6. Usage (as suggested)

Very simple activities are provided under these two heads (5 and 6).

7. Writing

Writing is a very important activity. More time should, therefore, be given for the purpose. The writing activity is placed towards the end as all the previous activities prepare ground for writing which is a very difficult task. Activities provided under this head are of two kinds: one sentence answer type questions from the text and other interesting/ creative activities. The first kind of activities lays the foundation for the second type of activities.

For one sentence answer type questions

- Help students to locate the answer in the text
- Get half the answer from the question itself and half from the text.
- The tense for question and answer should be the same.

If the question is in the past tense, the answer should be in the past tense, for example.

- It will be better if you yourself do these writing tasks as your preparation before asking students to do.

8. Mental Talk (MT)

Read about the method provided in Appendix-II. You yourself practise mental talk first before asking your students to do mental talk.

9. Let's Think

As the name suggests, the objective of this task is to activate the mind of the students – to think.

10. Follow-up Lessons

These lessons, as stated before, are sub-lessons based on the main lessons but comparatively simpler and shorter. Though based on the main lesson, these lessons take learner bit away from the main lesson, open up for them a broader world. Both you and your learners need to learn on your own. While the main lesson is more strictly structured and everything is done for you, in case of these lessons you have

freedom to frame your own activities and learners can learn on their own. This will test whether as a teacher you have grown professionally or not, whether you can frame activities on your own or not. Similarly whether your students have developed the language skills or not is also to be tested. You have to prepare yourself and make tasks for your learners from these sub-lessons under the following heads-

1. Reading aloud if the lesson is a poem.
2. Divide the lesson into SGPs for silent reading.
3. Frame comprehension questions.
4. Have task for VMDT.
5. Prepare tasks on chain-drill / dialogue activities.
6. Prepare tasks for Mental Talk and
7. Writing activities.

It is seen that our teachers do not develop professional skills because the textbooks provide everything for them in cut and dried ready made form and everything centred round the textbook. In contrast, in educationally developed countries, teachers prepare their own materials as often there are no fixed textbooks. Having fixed textbooks in cut and dried form has some advantages but many disadvantages, one of them being teachers not developing professional skills. These follow-up lessons will help you develop your teaching skills as you have to prepare the activities yourself. You have not only to prepare the tasks but often to write these tasks on the blackboard in good handwriting using them as blackboard texts. During inspections, the inspecting officials have been advised to see whether you have designed activities for the follow-up lessons. They have also been instructed to see whether you have got the post-reading tasks done by the students with your correction and feedback.

You have been provided with time schedule for each lesson – about 6 classes for a trailer lesson and about 10 classes for a main lesson and 5-6 classes for follow ups. But this is not fixed. You have freedom to readjust.

NOTES TO PARENTS

In educationally developed countries parents, tutors and teaching shops do not help learners to learn. But, unfortunately, here they have to help the learners mainly because the schools do not do their jobs properly. If you are helping your child

in his/her learning, kindly see that your child mostly learns own his/her own and develops the skills not just mugs up and scores good marks. In our current education there is a wide gap between learners' marks and skills. They pass with high marks without developing skills. This has increased your responsibility as you have to see that your ward not only scores good marks in examination but also have skill matching the marks she/he scores or else she/he will be unemployable. The employer these days do not believe in certificates and marks and conduct their own test to measure their future employees' skills to see whether they are employable.

This book in question is based on learner-centred approach. Learners are to learn on their own with little outside help. Kindly, therefore, see that they are not helped more than what is necessary or else these helps will become interferences, intervening more than helping in your wards learning. We will request you to go through the introduction to this book before helping your child learn English through this book.

NOTES TO GUIDES

You have a role to play in our current education. In case you are helping class IV students of Odia medium schools learning English, kindly go through the introduction to the book and the lesson before you teach English to them. This will help both you and your learners. We promise, if you teach English through this book as we want you to teach, both your learners and you yourself will gain.

NOTES TO INSPECTING OFFICIALS

It is comparatively easy to be an administrator and an educationist. But it is difficult to combine both to become an educational administrator. You must have understood how difficult your job is.

If you are to inspect an English class of class IV, kindly go through the introduction to the class IV textbook and see how the lessons are designed. When you inspect a class, please first know in which phase of teaching a lesson the teacher is. Is s/he in the pre-reading, while-reading or post-reading phase? The learners' role is different in these three phases of a lesson. Please identify the phase and evaluate the class accordingly. Following a learner-centred approach, we have done away with

teacher's reading aloud and then explaining a text. Please see that teachers do not do this rather give learners to read the text and do the activities on their own, the teacher playing the facilitator's role.

During inspection kindly see the learners' textbooks – the workbook part of it. See whether the learners have done the activities and the teacher has corrected the scripts with feedback. In the follow-up (sub-lessons) teachers are asked to frame comprehension questions and language activities. Please see whether they have done this. We provide at the end of the book indicators of learning, which will help you to judge the quality of teaching.

N.B.-

- Currently the greatest danger to education is cheap helps , particularly through cheap bazaar notes (meaning books) which , by spoon feeding , cripple the learners. We , therefore , request all avoid these books.

APPENDIX-II

Four Basic Techniques

1. Brainstorming (BS)

Brain is the centre of learning. No learning can take place without brain. We have to frequently use BS Method to activate the brains of our learners. This can be done in many ways. We can write a word, for example 'rain' on the BB and ask our learners to come up with words that relate to the word 'rain' like –storm ,umbrella ,flood, mud-----etc. Similarly we can introduce a topic from the textbooks of students by writing the title on the BB, then use BS to help learners predict the possible contents of the topic. Any writing, be it a paragraph, an essay or a letter can start with BS. In real life we often storm our brain to solve our day to day problems. If we have not done this before, let's make this a part of our present teaching.

2. Visual Memory Development Technique (VMDT)

Those who are endowed with powerful visual memory are found to learn faster. Whatever they see gets visually printed in their minds. In fact each one of us is endowed with visual memory. By closing our eyes, we can mentally see places, even persons, that we had seen long before. Our eyes act as cameras and our brain as computers to store what we see. But unfortunately our students while learning do not use their visual memory to the extent they do in their real life. Thus, the visual memory of our learners can be developed by systematic use of VMDT. Ask students, after they read the text, to take a photograph of the text with their eye cameras. Then close the book and ask them to locate words and phrases in the text (at the top, bottom, left, right , middle of the text). The students can also be trained to use this method on their own. They read a paragraph, take a mental photograph of the paragraph in their eye cameras. Next they cover the page and ask themselves to locate important words from the text by touching the cover with their index fingers. Then they remove the cover and see whether they have rightly located the word. This they can keep on doing till the paragraph gets printed in their brains. Students enjoy VMDT activities very much. Use of the method over a period of time helps learners to memorise contents.

3. Mental Talk (MT)

This is a very good method for learning language, particularly a second language like English. Language is a very complex matter. How humans pick up

language so quickly, particularly the small ones do so at homes. Earlier, it was thought that language was mostly learned by speaking. Language is verbal. But current researches have shown that language is more mental than verbal. We learn language so quickly and so fast because most of the time, without being aware, we mentally talk. This mental talk helps us master a language which is so complex.

But the thing is we mentally talk in our mother tongue. But it is possible, with a little conscious effort, to mentally talk in English. Suppose we are going to the market to buy certain things, usually we mentally talk (First I'll go to the medicine shop——) and plan. But with conscious efforts, we can do this in English. And once our learners begin to do this, learning of English becomes easy on his/her part. This has two benefits: One, in our context, there is little scope to speak in English, which is why we fail to learn English. Second, even when we get the chance to speak English, we hesitate to speak in English for fear of going wrong. Mental talk provides us the scope to use English without fear of going wrong.

Our students can be encouraged to mentally talk in English. We can call them to mentally repeat lines from a poem they have. Our students can be encouraged to mentally talk in English. We can call them to mentally repeat lines from a poem they have read or a dialogue they have practised to start with.

4. Chain-drill

Chain-drill is an utterance of a word, a phrase or a sentence, a line from a text or the title of a story – which the learners of a class repeat one after another in a serial order, usually at the beginning or at the end of a lesson. Students can also be asked to introduce themselves through chain-drills. For example, "I'm _____, I am from _____. What about you?" Chain-drill has the advantage of making everyone in a class speak something. Apparently, chain-drills seem boring but in reality it is interesting. When used, many think it is waste of time for many as one has to wait too long to get his/ her chance. But during this time the person waiting for his/her turn, in fact, keeps on mentally repeating what s/he plans to say when his/her turn comes. It is, therefore, not a waste of time as mental repetition helps one learn language and remember things better.

Some Important Tips on Handwriting, Asking Questions and Reading Aloud

Instructions for Good Handwriting :

1. Put your writing paper on a hard plain surface, not on heaps of books, on your lap or on a pillow.
2. Use ink /pencil (well sharpened) dot pen; bad dot pens affect handwriting.
3. Provide margins at the top and left of the sheet of paper you are going to write on.
4. Write in straight line. Ruled paper is more useful for the beginners.
5. Use unjoined printed letters.
6. Always tilt all your letters slightly to the right.
7. Provide proper space between words and lines.
8. Use neither too big nor too small letters.
9. Avoid over-writing.
10. Maintain distinction between your capital and small letters.
C,K,O,P,S,U,V,W,X,Y,Z
c,k,o,p,s,u,v,w,x,y,z
11. Take care of your problem letters –m,n,u,w , for example. You write the blackboard text on BB, then, move inside the class to help your students to follow these principles of good handwriting. Correct and instruct them where necessary.

Suggestions for asking questions during the while-reading stage:

1. Ask right question to the right person.
2. Distribute questions all over the class.
3. Ask question to the whole class-then identify whom you want to answer your question.

4. Never answer questions to yourself-provide clues to help your students to ask you questions.
5. Encourage your students to ask you question.
6. Encourage your students' question. Ask other students to answer.
7. If one fails to answer your question, ask the question to the whole class (you can answer his/her question)
8. Allow your students to answer in words/phrases....don't force them always to answer in full sentence.
9. Allow them to answer in chorus at times so that the shy ones can join with others develop courage to answer individually later.
10. Allow your students to consult the text while answering your questions
11. Allow your students to answer in Odia, if it is difficult on their part to answer in English.

Rules of Reading Aloud:

1. Make yourself familiar with the text before you read it in the class.
2. Introduce briefly what you are going to read.
3. Hold the book or paper up in front of you but not blocking your face.
4. Look interested in what you are reading.
5. Your voice should be clear and loud enough to be audible to all the learners. Use correct volume depending on the size and shape of the room, the number of people in it and what you are reading.
6. Don't read too fast. The listeners need time to absorb what is being read to them.
7. It is important to avoid monotony. Raise and lower your voice to show that a different character is speaking a dialogue, or to indicate a change of mood or to introduce a new idea.
8. You can stress important words by increasing the power of your voice or by lowering it.

9. If you make a mistake, don't stop or repeat yourself unless the mistake alters the meaning of the text.
10. If you can, make an eye contact with your listeners by looking up from your text and looking at them. Gauge their reactions with the help of their facial expressions.
11. If you have to turn a page during the reading, have the page you are going to turn ready before you finish the page you are reading.
